INSTALLATION INSTRUCTIONS

CP030201261

[for 2024-2025 Tesla Model 3]

Thank you for purchasing our products! Please contact us for any issues!

Parts List:

- 4 Self Tapping Screws
- **Tools Needed:**
- Punching cone
- Phillips Screwdriver

Note 1 When you receive this product, we recommend that you should check the accessories before the instruction.

Note 2 The password codes or fingerprints should be set with the DOOR OPEN to test the lock effectively without locking yourself out.

Safe installation

STEP 1 Clear out the contents of the center console for now, including the factory mat at the bottom of the console.

STEP 2 Orient the safe so that the lock is towards the rear of the vehicle. Place the safe inside the front compartment of the console.

STEP 3 Open the safe door and use the Punching Cone to poke the inner wall of the central console through the reserved holes of the safe wall. DOT NOT POKE PUNCHING CONE OVER 15MM! This could lead to a puncture of the entire central console.

STEP 4 Insert the 4 SELF DRILLING SCREWS by hand, and use a Phillips Screwdriver, complete tightening!

STEP 5 Tighten each of the self-drilling screws until the screw head rests against the insert nut and **STOP! DO NOT OVER TIGHTEN**, Overtightening will damage the fitting.

STEP 6 Enjoy your purchase!
