

INSTALLATION INSTRUCTIONS

CP030201262

[for 2024-2025 Tesla Model 3]

Thank you for purchasing our products! Please contact us for any issues!

Parts List:

- 4 Self Tapping Screws
- **Tools Needed:**
- Punching cone
- Phillips Screwdriver

Note 1 When you receive this product, we recommend that you should check the accessories before the instruction.

Note 2 The password codes or fingerprints should be set with the **DOOR OPEN** to test the lock effectively without locking yourself out.

Safe installation

STEP 1 Clear out the contents of the center console for now, including the factory mat at the bottom of the console.

STEP 2 Orient the safe so that the lock is towards the rear of the vehicle. Place the safe inside the front compartment of the console.

STEP 3 Open the safe door and use the Punching Cone to poke the inner wall of the central console through the reserved holes of the safe wall. **DOT NOT POKE PUNCHING CONE OVER 15MM!** This could lead to a puncture of the entire central console.

STEP 4 Insert the **4 SELF DRILLING SCREWS** by hand, and use a Phillips Screwdriver, complete tightening!

STEP 5 Tighten each of the self-drilling screws until the screw head rests against the insert nut and **STOP! DO NOT OVER TIGHTEN**, Overtightening will damage the fitting.

STEP 6 Enjoy your purchase!
