[for Lexus TX 2023-2026]

Thank You for Your Purchase! Need help? Contact us!

Parts List:

- 4x Shorter screws
- 1x Pin tool
- 2x Keys

Tools Needed:

- Punch tool
- 2x Longer Self-tapping screws
- Phillips Screwdriver

Before You Begin:

- ✓ **Check Parts** – Verify all included components before starting.
- ✓ **Review Instructions** – Read this guide thoroughly before installation.

Safety Notice:

Always set your Fingerprint codes with the door OPEN to prevent accidental lockouts. Test the fingerprint codes 3-5 times to ensure proper function.

Installation Steps

1. Prepare Armrest Box

- ▶ Remove all items from the armrest box

2. Prepare Safe

- ▶ Open safe door

3. Position Safe

- ▶ Place the safe into the console armrest box.
- ▶ Slide the safe firmly toward the front of the vehicle.

4. Locate the Pre-Drilled Holes

- ▶ Identify the pre-drilled holes on the frame of the safe.
- ▶ Use the included punch tool to drill pilot holes through these pre-drilled holes in the console box wall. If the punch tool is unable to create the holes, use the 2 longer self-tapping screws provided.

5. Secure Safe

- ▶ Place the self-tapping screws into the pre-drilled holes created in the previous step.
- ▶ Use included Screwdriver to secure screws

Caution: Overtightening may damage console
