Safety Notice:

🔒 Always **set your password** with the **door open** to avoid accidental lockouts. **Test** the password 3–5 times to ensure proper operation **BEFORE** fixing the safe in your vehicle.

Installation Steps

1) Open the safe and take out the fix steel cable.

2) Determine the installation position of the vehicle for the safe.

3) Select a seat leg for securing the safe.

4) Wrap the steel cable around the selected leg underneath the seat.

5) Thread one end of the steel cable through its loop.

6) Ensure the steel cable is fastened securely and cannot be detached from the seat leg.

7) Locate the fixing hole on the side of the safe.

8) Insert the steel cable head into the hole, then adjust the position and slide cable head into the narrow section.

9) Lock the safe ,confirm that the steel cable cannot be pulled out from the safe.

10) The installation is now finished.
